PROJECT

Cashier App

- Developed a responsive Point of Sale (POS) web application using Laravel, MySQL, Bootstrap, and Chart.js, with role-based access for Admin and Staff.
- Implemented core features: product and user CRUD, real-time dashboard analytics, stock monitoring, sales filtering, and export to Excel/PDF.
- Designed POS functionality for sales with/without membership, including point system and printable receipts.

Pharmacy App

- Built a web-based pharmacy management system using Laravel.
- Implemented CRUD operations and middleware for secure access control.
- Enabled export of data to PDF and Excel formats for reporting purposes
